

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter, it discussed the conclusion and suggestion of the research

1.1 Conclusion

After giving the questionnaire, vocabulary test and writing test to the tenth grade students of MA Roudlotul Muttaqin, MA Nurul Ulum and MA Nahdlotul Ulama, I analyze and calculate the result of the questionnaire about students' interest learn about vocabulary mastery and writing procedure text, the result of vocabulary test and the result of writing test. After analyzing and calculating the research, I conclude the result of the research was significant and positive correlation between students' vocabulary and writing procedure text competence viewed their interest. It was showed by the result of the data. The value of the correlation was 0.417. The grade of the correlation was moderate. The value of the significant correlation was 6.78

1.2 Suggestions

I would also give some suggestions. First ,For the teacher when the teacher teaching vocabulary and writing procedure text, sometimes the students were less motivated so the teacher should always motivate them during the teaching and learning process. Second, to the students. The students should always keep up their motivation and self-confidence in learning by practicing writing procedure text and

enriching the vocabularies. The last for me, I expected that there would be other researchers who investigated other aspects related to writing or other language skill. The other researcher should have more innovation in doing the similar research then the result could deeply achieve contribution for education.
