

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the result of research, it can be concluded that:

1. The developed interactive CD is feasible for written English descriptive text teaching. It is proven by the assessment result from the expert of the media and expert of subject matter. The media scored 94% from the expert of the media assessment and 100% from the expert of subject matter.
2. The students questionnaire showed that the interactive CD is effective for the teaching of written English descriptive text. It is proven by the result of the product trial in small-scale product trial which categorize in very good criteria with 98.16%. In addition, the media also gained positive response from students in large-scale product trial with 91.4% which was also considered in very good criteria.

5.2 Suggestions

Based on the result of the research, the suggestions as follow:

1. The teachers are suggested to use interesting media because learning writing skill through interactive multimedia could motivate students and make them easy to understand especially in descriptive text material, so the learning process will not be effective if the teachers still use conventional teaching.

2. To the student, in the learning descriptive text through interactive CD would make the students more interested, enthusiastic, and not bored in the learning process. In addition, learning written English written instruction descriptive text using interactive CD is more interesting and easy to use so it is more effective and efficient in material understanding.
3. To the researcher, interactive CD should be installed into other application form including gadget or smartphone so media can be more feasible for the users.
