TAHUN 2019

ABSTRAK

**Hidayatul Magfiroh\*. Dewi Puspitaningrum\*\*. Fitriani Nur Damayanti\*\*.**

**ASUHAN KEBIDANAN KOMPREHENSIF PADA NY. R UMUR 30 TAHUN  
GIIPIA0 HAMIL 37<sup>+4</sup> MINGGU DI PUSKESMAS BANGETAYU SEMARANG**

**(xiii + 157 halaman + 15 tabel + 7 gambar + 6 bagan + 10 lampiran)**

**Latar belakang :** asuhan komprehensif adalah asuhan kebidanan berkelanjutan. Masalah kesehatan kehamilan meningkatkan jumlah morbiditas dan mortalitas. Menurut KEMENKES RI (2017) jumlah AKI Indonesia 1712/100.000 KH. AKB (2017) sebesar 10294/1.000 KH. Dalam mengakses pelayanan kesehatan ibu dilakukan asuhan kebidanan komprehensif atau *Continuity of Care*.

**Tujuan :** penulisan LTA mengkaji dalam bentuk studi kasus asuhan komprehensif di Puskesmas Bangetayu Semarang.

**Metode :** penulisan LTA menggunakan pendekatan 7 langkah Varnay dan SOAP.

**Hasil :** hasil LTA berdasarkan diagnose Ny. R umur 30 tahun GIIPIA0 usia kehamilan 37<sup>+4</sup> minggu dengan keluhan kadang kencing. Persalinan spontan pervaginam berlanjut masa nifas. Plenning yang diberikan KIE mengenai keadaan fisiologi ibu serta tanda bahaya nifas. Pada 08 Maret 2019 pukul 10.00 WIB dilakukan pemasangan alat kontrasepsi implant. Riwayat BBL dengan BB 2800 gram, PB 48 CM, jenis kelamin perempuan, menangis kuat, gerakan aktif, kulit kemerahan dan hasil baik selama 14 hari pemeriksaan *home visit*. Pada asuhan komprehensif ini tidak didapatkan kesenjangan.

**Kesimpulan :** pada penerapan asuhan kebidanan komprehensif tidak terdapat kesenjangan antara teori dan praktik kebidanan dilahan.

Kata kunci : Asuhan Komprehensif, LTA

COMPREHENSIVE MIDWIFERY CARE ON MRS. R, 30 YEARS OLD, GIIPIA0,  
37<sup>+4</sup>WEEKS PREGNANT AT PUSKESMAS BANGETAYU SEMARANG

(xiii + 157 pages + 15 tables + 7 figures + 6 schemes + 10 appendices)

**Background:** Comprehensive care is a continuous midwifery care. Health problems during pregnancy may lead to the increase of morbidity and mortality. According to a data by Ministry of Health of Indonesia (2017), Indonesian AKI (Mother Mortality Rate) was 1712/100.000 and AKB or Birth Rate (2017) was 10294/1000. To give health service access to mother, midwifery care or the Continuity of Care was given.

**Objectives:** This final project was a case study in a form of comprehensive midwifery care at Puskesmas Bangetayu Semarang.

**Methods:** In writing the project, 7 steps approach by Varnay and SOAP were used.

**Finding:** Based on the diagnosis, Mrs. R, 30 years old, GIIPIA0, 37<sup>+4</sup>weeks pregnant complained of frequent contraction. Spontaneous vaginal birth was continued by postpartum bleeding period. The planning was to give Communication, Information, and Education (KIE) about the physiological condition of the mother and some warning signs during postpartum haemorrhage. On March 8, 2019 at 10 a.m., implant contraception was installed. New-born history was 2800 gram and 48 cm, female, high-pitched cry, active motion, skin redness, in good condition within 14 days home visit. And during the comprehensive care, there was no gap between planning and implementation.

**Conclusion:** There was no gap between the implementation, theory, and practice of the given midwifery care on field.

Key words : comprehensive care, final project
