Journal of Nutrition & Food Sciences

Dear Kusuma,

Reviewers have now commented on your paper. You will see that they are advising that you revise your manuscript. For your guidance, reviewers' comments are appended below.

Please submit a list of changes or a rebuttal against each point which is being raised when you submit the revised manuscript. Your revision is due by Oct 09, 2017.

To submit a revision, go to <http://lifesciences.edmgr.com/> and log in as an Author. You will see a menu item call Submission needing Revision. You will find your submission record there or you can submit via mail at nutrition@scholarlyjournals.org

Reviewers' comments:

Reviewer #2: The work of the authors are of great significance. However, I would recommend that the authors carry out extensive grammatical corrections along with spelling checks in order to make it comprehensible to the readers.

Reviewer #3: In my opinion 24 respondents involving in this research is too small amount to say that results of the study are reliable. What about control group? Why did not the authors take the control group into account? In the part introduction - there are lots of references which are not present at the end (in the part references). I think that authors should write much more about research method (food frequency questionnaire should be added to the manuscript). In some part of manuscript English should be improved.
