Gambaran Pengetahuan *Driver Ambulance* Pra Rumah Sakit tentang *Defensive Driving*

xiv + 38 halaman + 8 tabel + 1 skema + 10 lampiran

Abstrak

Ambulance adalah alat transportasi untuk mentransport pasien segera ke pelayanan kesehatan yang didalamnya terdapat anggota penting yaitu *driver ambulance*. *Driver ambulance* ini membutuhkan pengetahuan *defensive driving* yaitu pengetahuan mengemudi untuk meminimalkan resiko kecelakaan agar tidak menunda pemindahan pasien. Berdasarkan hal tersebut maka tujuan penelitian ini adalah mengetahui gambaran pengetahuan *driver ambulance* pra rumah sakit tentang *defensive driving*. Desain penelitian ini adalah deskriptif. Populasi dalam penelitian ini adalah 47 *driver ambulance*. Tehnik sampling yang digunakan adalah total sampling sebesar 38 *driver* yang memenuhi kriteria inklusi. Hasil penelitian didapatkan bahwa *driver ambulance* pra rumah sakit rata-rata berumur 33.97 tahun, pendidikan terakhir SMA/ sederajat sebesar (68.4%), lama kerja rata-rata 2,89 tahun, mengikuti pelatihan *defensive driving* sebesar (26.3%), dan pengetahuan *driver ambulance* pra rumah sakit tentang *defensive driving* kategori baik sebesar (86,8%) , sisanya memiliki pengetahuan dengan kategori cukup sebesar (13.2%). Pengetahuan *driver ambulance* pra rumah sakit sebagian besar memiliki pengetahuan yang baik sebesar (86.8%). Berdasarkan penelitian yang telah dilaksanakan disarankan mengadakan pelatihan *defensive driving* bagi *driver ambulance* untuk meningkatkan pengetahuan *driver ambulance* serta untuk *refresh* pengetahuan.

Kata Kunci : Pengetahuan, *Ambulance*, *Defensive Driving*

The Description of Pre-Hospital Ambulance Driver's Knowledge About Defensive Driving

xiv + 38 page + 8 tabel + 1 skema + 10 lampiran

Abstract

Ambulance is a means of transportation to transport patients immediately to health services in which there is an important member, namely the ambulance driver. This ambulance driver requires defensive driving knowledge, namely driving knowledge to minimize the risk of accidents so as not to delay the transfer of patients. Based on this, the purpose of this study is to determine the knowledge of pre-hospital ambulance drivers about defensive driving. This research design is descriptive. The population in this study were 47 ambulance drivers. The sampling technique used was a total sampling of 38 drivers who met the inclusion criteria. The results showed that the pre-hospital ambulance drivers were 33.97 years old, the last education was high school / equivalent (68.4%), the average length of work was 2.89 years, following defensive driving training (26.3%), and driver knowledge Pre-Hospital Ambulance about Defensive Driving in good category (86.8%), the rest have sufficient knowledge (13.2%). Knowledge Most of the pre-hospital ambulance drivers have good knowledge (86.8%). Based on the research that has been carried out, it is suggested to hold defensive driving training for ambulance drivers to increase ambulance driver knowledge and to refresh knowledge.

Keywords : Knowledge, Ambulance, Defensive Driving
