

## THE IMMUNOGENICITY OF FLAGELLIN PROTEIN OF SALMONELLA TYPHI OF SEMARANG AND SALATIGA ISOLATES

S Darmawati, Al Kartika - The 3rd International ..., 2019 - repository2.stikesayani.ac.id

Background; Salmonella typhi (S. typhi) is the cause of typhoid fever infection. Its pathogenicity is influenced by the adhesion ability of S. typhi's flagella to the host cells. Each flagellum's adhesion ability is varied, influenced by the flagellin protein type and its interaction with the host. Objectives; at finding out the immunogenicity of flagellin protein of S. typhi of Semarang and Salatiga isolates. Methods; The samples are flagellin protein coded by fliC 1500bp gene (Semarang isolate) and fliC 1262 gene (Salatiga isolate), each ...
