Dear Echo Xiong

Thank you very much for the official acceptance letter!

In the letter I have found the reviewer comment, that I should revise number of author to not more than 5. So in my paper I would like to respond the comments as follows:

I propose to keep 7 names of authors because with 2 reasons:

1. All of these authors truly contribute in this work as a team. From my part as the team leader, excluding 2 of them will be ethically inappropriate.
  2. As I checked in IJSED archive of articles, there are already several published papers with more than 5 authors
  3. As general, there are large number of other papers in scientific database published by many authors
- I hope the reviewers could accept my proposal/ respond based on these reasons, and could continue to process my paper.
