***ABSTRACT***

The purpose of this study was to determine and obtain empirical evidence about the effect of audit rotation, audit tenure, auditor fees, and firm size on audit quality (a case study on state-owned companies listed on the Indonesia Stock Exchange for the 2016-2020 period). The sample from this study used 20 state-owned companies listed on the Indonesia Stock Exchange in 2016-2020 which were taken using the purposive sampling method. Data collection in this study was carried out using the documentation method, which was done by downloading the company's annual financial information. Data were analyzed using logistic regression analysis. The results of the study identified that audit rotation had no effect on audit quality, audit tenure had no effect on audit quality, auditor fees had a positive effect on audit quality, while firm size had a positive effect on audit quality.

Keywords: Audit rotation, Audit tenure, Auditor fee, Company size and audit quality
