

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1. Conclusion

The effectiveness of write around method and subtitled movie on students' writing performance of grade eleventh in MAN Kota Tegal had been conducted by the researcher, therefore it could be concluded that:

1. There was an improvement on students' writing performance based on students' posttest results compare with the pretest results. Both of groups were got improvement, but the improvement in the control class was not as high as the experimental class.
2. The posttest average of experimental class had better improvement from the pretest average, that were 11.69 and the control class only had average improvement of 5.36. It means that write around method and subtitled movie improved students' writing performance with significant difference result. This is suggest that write around method and subtitled movie are effective to use in writing lesson.
3. The use of the write around method and subtitled movie also encouraged the students to find new ideas in writing. This method and media also made the learning process more interesting and the students could understand the material easily.

## 5.2. Suggestion

After the research had done, the researcher proposes some suggestions that would be helpful to make successful teaching and learning writing process in Senior High School level. The suggestions are as follows:

1. The teachers should be aware that they have important role in the teaching learning process. It is a must that the teacher should be smart and detail to choose method and media based on the situation and the condition of the students.
2. The teachers can use write around method and subtitled movie as one way to enrich the reference about the technique to improve the students' writing performance, especially for the eleventh grade students of Senior High School. By using write around method and subtitled movie, the students can improve their writing performance.
3. For readers, they can explore the aspects of this method and media which are not presented yet in this research. Furthermore, they can use it as their reference for their research. This research might give the readers more information about the effectiveness of using write around method and subtitled movie in the teaching of writing.
